Control

The built-in control panel of the **Ceileo T** fans enables the following settings:

- turn-off delay
- humidity level
- air flow for modes 1 and 2

Name	Adjustment range for operation modes 1 and 2
Ceileo 200 T	Off / low speed / high speed
Ceileo 250 T	Off / low speed / high speed
Ceileo 300 T	Off / low speed / high speed

MANUAL CONTROL

The fan is controlled by means of the CDP-2/10 speed switch (available as a specially ordered accessory).

AUTOMATIC CONTROL

Timer "T": The fan is constantly set to the mode 1. The mode 2 is triggered by the light switch closing. Upon the light switch opening the built-in turn-off delay timer keeps the fan running in the mode 2 from 1 to 90 minutes. On elapsing of this period the fan reverts to the mode 1.

Timer "T" and humidity sensor (available as a specially ordered accessory): the fan runs constantly in the mode 1.

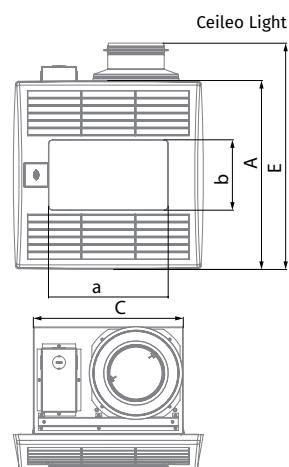

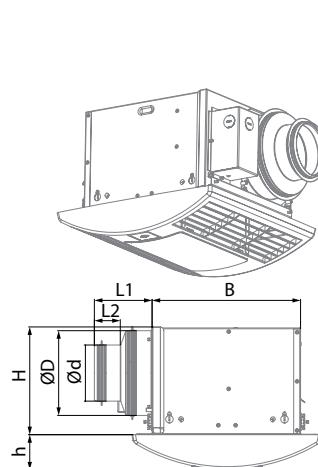

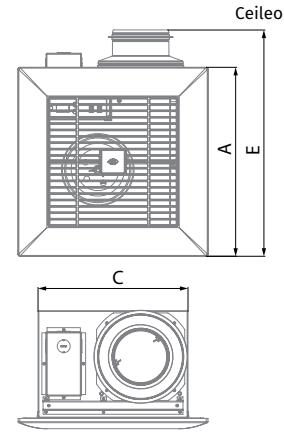

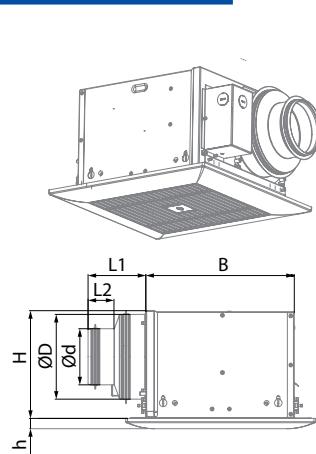

If the indoor humidity level exceeds the sensor threshold value set in the 60-90 % range, the fan switches to the mode 2. When the humidity level reverts to the pre-set value, the built-in turn-off delay timer keeps the fan running in the mode 2 from 1 to 90 minutes. On elapsing of this period the fan reverts to the mode 1.

Timer "T" and motion sensor (available as a specially ordered accessory): the fan runs constantly in the mode 1.

If the motion sensor detects movement within its range, the fan goes to the mode 2. When the movement is no longer registered, the built-in turn-off delay timer keeps the fan running in the mode 2 from 1 to 90 minutes. On elapsing of this period the fan reverts to the mode 1.
